Notes: A: I am getting an error message when I try to open regedit or regtweak from the start menu. This is a windowing problem related to running X Windows with the MS Windows service. Check the Windows logs on the system with the error and Microsoft support may be of help in finding the solution. The Registry Editor is unable to access the file '...\Winlogon.exe' on the specified computer. Error code: 2. (0x2) Error Code 2 can be one of several things: The file does not exist, either on disk or on the remote host The path specified is either incorrect or doesn't exist The file or path doesn't belong to you, and you aren't authorized to access it. You'll find more information about the specific error code in a MS support article. Q: Why is changing of string value in one method doesn't change the value of that variable in another method in c++? In the below code snippet, I am trying to change a string in one method and then check the value of that same string from another method. Why is it that the value of s never gets updated? string s = "original value"; void method1() { cout At long last, a superhero movie without giant monsters. For what it's worth, writer-director Andrew Niccol has apparently read your reviews of The Host and says that he's received a lot of feedback from you folks about the similarities between that movie and The Orville. While Niccol doesn't

The invention relates to a device for the continuous supply of the sheets of a book printing machine, comprising a reel consisting of cardboard or paper, which is intended for winding the book printing material, and a winding device located in the rear region of the reel, which can be moved in longitudinal direction of the reel. The prior art comprises a variety of arrangements for the continuous supply of book printing material. In this respect reference is made to the U.S. Pat. No. 4,491,398 and the German Pat. No. 1,797,643. However, in these arrangements, it is only the first delivery rolls of the printing machine which can be moved relative to the reel, whereby the device has to be adjusted to the printing machine in such a manner that the printing material is in this relative position provided for the webbing of the printing material. This results in a waste of material and time and involves substantial constructional expenditure. In the case of a further prior art arrangement, according to DE-OS No. 26 45 725, a further supply of book printing material is arranged behind the printing machine,
