Video Converter supports a wide range of formats and codecs, all of which can be switched dynamically by using the “Settings” dialog box. Besides, they also include a choice of video encoding and audio encoding formats. For example, for AAC encoding we have MP3 and AC3 codecs, while OGG is dedicated for the OGG format. Moreover, VCD and other simple (and complicated) conversion tasks are also included in the pack. One can choose from a wide collection of advanced settings while converting, such as mirroring, streaming, tweaking color tones and frame rate. In addition, the codecs can be modified to suit each project in the “Settings” dialog box. ColorFX Multi software allows for a wide range of adjustments when converting video clips. The user can choose from a large range of effects, frames, keywords, titles, transitions and also subtitles. ColorFX DVD authoring software supports advanced-level design options while developing a DVD project. One is allowed to choose from a wide range of built-in templates and also design personal menus and navigation buttons, cover art, labels, menu background color, chapter backgrounds, chapter menu background, and more.
