Over the years, the Raccoon City police force has grown increasingly corrupt as the U.S. Government has closed in to pressure them and their directors to perform their duties. A top secret military police team known as the Bio Hazard Countermeasures Squad — B.H.C.S. — is then activated to seal the town away for safe-keeping. Led by a mysterious woman referred to as "Mother" who has a team of ruthless killer cyborgs at her disposal, the group begins their risky operation to search for the source of the evil inside the deserted town. What they find during their mission will not only change the fate of the town, but perhaps the fate of the world. In this suspenseful first chapter to the Resident Evil series, you must battle through a series of frightening and intriguing scenarios in order to rescue your partner and escape this deadly, zombie-infested town.
